**Account Information**

- 1. Rate Information.** The Dividend Rate and Annual Percentage Yield (APY) on your accounts are set forth above. The APY is a percentage rate that reflects the total amount of dividends to be paid on the Dividend Rate and the frequency of compounding for an annual period. For dividend bearing accounts, the Dividend Rate and APY may change frequently as determined by the Credit Union’s Board of Directors.
- 2. Nature of Dividends.** Dividends are paid from current income and available earnings after required transfers to reserves at the end of a dividend period. The Dividend Rate and APY disclosed are the anticipated rate and yield the Credit Union will pay for the applicable dividend period.
- 3. Compounding and Crediting.** Dividends will be compounded and credited as set forth above. The Dividend Period for all dividend-bearing accounts begins on the first calendar day of the month and ends on the last calendar day of the month.
- 4. Accrual of Dividends.** Dividends will begin to accrue on cash and noncash (e.g. checks) deposits on the business day you make the deposit to your account. If you close your account prior to dividend crediting, you will not be paid accrued dividends.
- 5. Balance Information.** The minimum opening balance required for each account is set forth above. The average minimum balance required to earn dividends and obtain the APY on accounts is set forth above. Dividends are calculated by the average daily balance method which applies a daily periodic rate to the average daily balance in the account for the period. The average daily balance is determined by adding the principle in the account for each day of the period and dividing that sum by the numbers of days in the period. If the average daily balance falls below the established minimum, dividends will not be paid at month end.
